

2.4m Lightweight Plastic Expanding Barrier

Product Images

Description

This lightweight portable, expanding, crowd control barrier is compact and suitable for indoor or outdoor use.

The plastic slats and legs are strong, and if extra stability is needed the legs can be filled with water to make it even sturdier. Reflective adhesives are on the slats for the night or low light visibility.

- **When fully extended, the unit is 2.3metres wide.**
- A versatile and portable solution to all your pedestrian & traffic control problems.

Additional Information
