MedSense Infrared Non-Contact Thermometer

Product Images

Description

The MedSense Infrared Non-Contact Thermometer provides users with a more convenient, non-invasive way of testing body temperature without physical contact. Just place the device at a safe distance of 3-5 cm distance away from the skin and aim it at the middle of the forehead with the help of the LED positioning light. Press a button to take a measurement and the thermometer will give an accurate temperature reading instantly. This non-contact thermometer is perfect for families, medical professionals, and workplace or public testing

that requires minimal physical contact. For consecutive testing, the thermometer requires just 10 seconds between tests to ensure accurate measurements.

- Clinically proven accuracy with instant 1 second readings.
- Infrared contactless measurement of body temperature. Dual-mode use for forehead or objects.
- Multi-coloured backlight display for Normal, Attention and Fever temperatures.
- 9 sets of memory values. Keep track of body temperature fluctuations. Recall the last 9 temperature readings.
- Results in °C or °F. On/Off audible alerts.

SPECIFICATIONS

Measurement Range Body temperature 34.0 - 43.0°C.(93.2 - 109.4°F)

Object temperature 0 - 93.2°C (32 - 199.7°F)

Accuracy (35.0°C~42.0°C) ±0.2°C, (95.0°F~107.9°F) ±0.4°F, other temperature ±0.3°C.

Measurement time 1 second

Dimensions 34mm x 160mm x 50mm

Net Weight Approx. 68g (excluding batteries)
