

SpillSmart BaseSorb Bottle 900g

Product Images

Description

SpillSmart BaseSorb Neutraliser is a spill control product designed to rapidly absorb, encapsulate and neutralise liquid based spills. This effective product contains a neutraliser and pH colour indicator combined with a highly absorbent polymer, to safely clean up a spill preventing workplace injuries.

BaseSorb's unique formula interacts with the spilled chemical, converting the liquid into a gelled mass. Once transformed the chemical spill

can be safely removed, cleaned up and disposed of in accordance with local regulations.

Designed for:

- Safe clean-up of aggressive chemical spills, such as Caustic Soda, Potassium Hydroxide.
- Chemical storage areas & processing plants.
- Motor workshops & battery retailers.
- Transport & storage facilities.
- Universities, colleges & schools.
- Hospitals & laboratories.

Features:

- Colour changes indicating neutralisation has taken place.
- Neutralises and encapsulates.
- Indicates with Orange colour when neutralised.
- Transforms into a gel for a safe and easy clean-up.
