

Safety Cushion Wet Area Mats

Product Images

Description

Safety Cushion Wet Area Mats are a popular and versatile general purpose safety mat.

- The raised surface pattern provides a high level of traction reducing slips.
- Lugs on the underside allow liquid to flow out from under the mat, keeping the surface dry.

- Bevelled edges on all four sides reduce the chance of trips and falls.
- **Terracotta mats include a grease resistant formula - makes them ideal for greasy environments.**
